

SheepMetriX

eID Implementation on Farm Workshop

This workshop will provide sheep and goat producers with technical support and independent advice on how to navigate the hardware and software options surrounding eID implementation at a commercial production level, and the planning process behind it, so you can get the most out of your eID system. A one-on-one follow up session is also supported following the workshop attendance.

Only
\$99/business
(max. 2
people)

Time: 9:00am to 3:30pm

Location: [Check out our Website for the latest workshop dates and locations](#)

This workshop is supported with funding from AgriFutures Australia and is part of the AgriFutures Producer Technology Uptake Program.

Topic Area 1:

Develop your implementation plan based on production and breeding objectives and review potential hardware/software options

Topic Area 2:

Data collection - timing and protocols. Data storage - what, when, where & how

Topic Area 3:

How to manage and analyse your data. Using this data for production, breeding and management systems.

One on One Session - Online

1 hour online session with the SheepMetriX team to discuss issues, ideas or questions post the workshop attendance.
